
Kesler Aristide-Bonheur

Digital Manufacturing & MES Professional

490 Harrison Ave
Boston, MA 02118
(617) 888-1021
kesleraristide@gmail.com

Professional Summary

Manufacturing and digital operations professional with hands-on experience supporting MES-enabled, cGMP-compliant manufacturing environments within life sciences. Proven ability to translate shop-floor operations, quality requirements, and automation systems into effective digital manufacturing workflows. Experienced in MES execution, system troubleshooting, cross-functional collaboration, and continuous improvement initiatives supporting compliant and efficient operations.

EXPERIENCE

Nitto Denko Avecia, Milford, MA - *Manufacturing Chemist II / MES Lead*

Aug 2025 - PRESENT

- Supported digital manufacturing integration by revising electronic batch records aligned with future-state MES workflows and day-to-day manufacturing requirements.
- Acted as a site-level MES subject matter contributor, bridging manufacturing, engineering, and quality requirements to ensure compliant and executable digital batch records.

Moderna, Cambridge, MA - *MES Analyst II*

Jul 2024 - Jul 2025

- Served as primary MES (Syncade) and DeltaV support resource, resolving execution issues impacting batch continuity in a 24/7 manufacturing environment.
- Supported troubleshooting of MES workflows and automation systems to maintain uninterrupted digital batch execution.
- Collaborated cross-functionally with Manufacturing, Quality, and Engineering to resolve system and execution challenges.

Moderna, Norwood, MA - *Manufacturing Associate*

Jan 2023 - Jul 2024

- Qualified trainer for Syncade MES batch records, supporting onboarding, system adoption, and compliant digital execution.

-
- Supported automation-enabled batch execution using MES, SAP, and DeltaV systems within regulated manufacturing operations

MOMA Therapeutics, Cambridge - *Manufacturing Coordinator*

Feb 2022 - Dec 2022

- Managed laboratory procurement, vendor coordination, and inventory supporting automation-enabled research environments.
- Implemented tracking systems for equipment maintenance, calibration, and asset readiness to support uninterrupted operations.

Broad Institute, Cambridge, MA - *Process Development Associate*

Mar 2021 - Aug 2021

- Utilized MES platforms to document batch records, track sample progression, and ensure data integrity within regulated workflows.
- Supported development of scalable, high-throughput workflows, including automation-assisted PCR-based assay execution.

Foundation Medicine, Cambridge, MA - *Digital Supply Chain Specialist*

Sep 2019 - Feb 2022

- Leveraged enterprise systems to manage inventory, track assets, and streamline procurement workflows in regulated laboratory environments.
- Supported asset visibility and reliability initiatives through structured data tracking and reporting.

TECHNICAL SKILLS

- **Digital Manufacturing Systems**
MES (Syncade, PAS-X), Automation & Control Systems (DeltaV), Manufacturing Data Systems (OSI PI)
- **Analytics & Decision Support**
Excel (advanced), Power BI, Spotfire, Minitab
- **Enterprise & Quality Systems**
SAP, IBM Maximo, Veeva, LIMS, Benchling
- **Delivery & Compliance**
SOP documentation, deviation investigations, CAPA support, GMP compliance, Jira, cross-functional collaboration

EDUCATION

University of Massachusetts Boston, Boston, MA- *Master of Business Administration*

Sep 2021 - May 2023

Curry College, Milton, MA- *Bachelor of Science, Biomedical Engineering*

Sep 2015 - May 2019

CERTIFICATIONS

Industrial Internet of Things (IIoT) — University of Michigan

SQL for Data Science — University of California, Davis

Digital Manufacturing & Design — State University of New York
