

Digital Manufacturing Value Case & KPI Impact Model

Fictional values define baseline and target-state assumptions for a directional value case.

KPI	Baseline	Target	Improve	Improve %	Impact	Confidence
Deviation investigation effort (hrs/month)	120	84	-36	30%	Reduced investigation load	Medium
Batch review cycle time (days)	8	5	-3	38%	Faster review readiness	Medium
Manual documentation effort (hrs/month)	180	105	-75	42%	Less reconciliation	Medium
Right-first-time execution (%)	88	94	+6 pts	7%	Improved execution quality	Medium
Release readiness (%)	72	88	+16 pts	22%	Earlier release readiness	Medium
Manufacturing visibility score	55	78	+23	42%	Better decision support	Low-Med
Schedule adherence (%)	82	90	+8 pts	10%	Improved planning signal	Low-Med

Digital Manufacturing Value Case & KPI Impact Model

Baseline reflects effort and readiness signals before MES/EBR improvements.

KPI	Baseline	Target	Improve	Improve %	Impact	Confidence
Deviation investigation effort (hrs/month)	120	84	-36	30%	Reduced investigation load	Medium
Batch review cycle time (days)	8	5	-3	38%	Faster review readiness	Medium
Manual documentation effort (hrs/month)	180	105	-75	42%	Less reconciliation	Medium
Right-first-time execution (%)	88	94	+6 pts	7%	Improved execution quality	Medium
Release readiness (%)	72	88	+16 pts	22%	Earlier release readiness	Medium
Manufacturing visibility score	55	78	+23	42%	Better decision support	Low-Med
Schedule adherence (%)	82	90	+8 pts	10%	Improved planning signal	Low-Med

Digital Manufacturing Value Case & KPI Impact Model

Target values reflect improved execution clarity, review readiness, and integration visibility.

KPI	Baseline	Target	Improve	Improve %	Impact	Confidence
Deviation investigation effort (hrs/month)	120	84	-36	30%	Reduced investigation load	Medium
Batch review cycle time (days)	8	5	-3	38%	Faster review readiness	Medium
Manual documentation effort (hrs/month)	180	105	-75	42%	Less reconciliation	Medium
Right-first-time execution (%)	88	94	+6 pts	7%	Improved execution quality	Medium
Release readiness (%)	72	88	+16 pts	22%	Earlier release readiness	Medium
Manufacturing visibility score	55	78	+23	42%	Better decision support	Low-Med
Schedule adherence (%)	82	90	+8 pts	10%	Improved planning signal	Low-Med

Digital Manufacturing Value Case & KPI Impact Model

Improvement calculations compare baseline to target values and assign qualitative impact.

KPI	Baseline	Target	Improve	Improve %	Impact	Confidence
Deviation investigation effort (hrs/month)	120	84	-36	30%	Reduced investigation load	Medium
Batch review cycle time (days)	8	5	-3	38%	Faster review readiness	Medium
Manual documentation effort (hrs/month)	180	105	-75	42%	Less reconciliation	Medium
Right-first-time execution (%)	88	94	+6 pts	7%	Improved execution quality	Medium
Release readiness (%)	72	88	+16 pts	22%	Earlier release readiness	Medium
Manufacturing visibility score	55	78	+23	42%	Better decision support	Low-Med
Schedule adherence (%)	82	90	+8 pts	10%	Improved planning signal	Low-Med

Digital Manufacturing Value Case & KPI Impact Model

Dashboard view highlights where directional operational value may appear.

KPI	Baseline	Target	Improve	Improve %	Impact	Confidence
Deviation investigation effort (hrs/month)	120	84	-36	30%	Reduced investigation load	Medium
Batch review cycle time (days)	8	5	-3	38%	Faster review readiness	Medium
Manual documentation effort (hrs/month)	180	105	-75	42%	Less reconciliation	Medium
Right-first-time execution (%)	88	94	+6 pts	7%	Improved execution quality	Medium
Release readiness (%)	72	88	+16 pts	22%	Earlier release readiness	Medium
Manufacturing visibility score	55	78	+23	42%	Better decision support	Low-Med
Schedule adherence (%)	82	90	+8 pts	10%	Improved planning signal	Low-Med

Largest directional effort reduction

Manual documentation effort

Highest readiness movement

Release readiness +16 pts

Model confidence

Directional / Medium

Digital Manufacturing Value Case & KPI Impact Model

All values are illustrative, fictional, directional, and non-proprietary.

KPI	Baseline	Target	Improve	Improve %	Impact	Confidence
Deviation investigation effort (hrs/month)	120	84	-36	30%	Reduced investigation load	Medium
Batch review cycle time (days)	8	5	-3	38%	Faster review readiness	Medium
Manual documentation effort (hrs/month)	180	105	-75	42%	Less reconciliation	Medium
Right-first-time execution (%)	88	94	+6 pts	7%	Improved execution quality	Medium
Release readiness (%)	72	88	+16 pts	22%	Earlier release readiness	Medium
Manufacturing visibility score	55	78	+23	42%	Better decision support	Low-Med
Schedule adherence (%)	82	90	+8 pts	10%	Improved planning signal	Low-Med
